1 Introduction

The GettingStarted container is a storage space dedicated to the Starter Kit Plus.

The Starter Kit Plus provides a pre-configured secure application for demonstration purposes. It uses the PKI2go services for enabling highly secured communication amongst all entities (services and users) of the application.

As an initial step, in order to have access to the periNODEs and the other periMICA containers in the demo application, two certificates need to be installed in your system. The GettingStarted container stores both certificates and the instructions for a successful installation (Figure 1):

2 Further Documentation

2.1 Starter Kits

Document Name	Description
Starter Kit Plus Product Summary [8]	A product features summary documentation for the <i>Starter Kit Plus</i> .
Starter Kit Plus Quick Start Guide [9]	A setup guide for the <i>Starter Kit Plus</i> product.
Starter Kit Plus User Guide [11]	A detailed description of the setup <i>Starter Kit Plus</i> .
Starter Kit Plus Security Certificates Installation Guide [10]	A small guide on how to install security prerequisites for accessing the various entities of the <i>Starter Kit Plus</i> setup.
Starter Kit Product Summary [12]	A product features summary documentation for the available <i>Starter Kits</i> .
Starter Kit Quick Start Guide [13]	A setup guide for the <i>Starter Kit</i> products.

2.2 periMICA

Document Name	Description
periMICA Product Summary [3]	A product features summary documentation for the <i>periMICA</i> .
periMICA Quick Start Guide [4]	A setup guide for the product <i>periMICA</i> . The starting point when you are new to the product.
periMICA User Guide [5]	A detailed description and reference documentation of the product <i>periMICA</i> .
PKI2go Container User Guide [6]	A detailed description of the public key infrastructure (PKI) <i>periMICA</i> container 'PKI2go'.
Security Certificates Installation Guide [7]	A guide on how to install prerequisites certificates on various platforms (MAC, Windows and Linux).
periMICA Debian Container User Guide [1]	A detailed description of the base container of a <i>periMICA</i> lxc-based container. It's the starting point for container development.
<i>periMICA Product ReBranding Application Note</i> [2]	A detailed description for development to re-brand the product <i>periMICA</i> to a dedicated customer corporate design.

3 Contact & Support

For customer support, please call us at **+49 30 863 206 701** or send an e-mail to support@perinet.io.
